

# SnippetSentry - Manage Users Test Plan

---

## Test Case: Create New User - Valid Info

Priority: P0

### **Preconditions:**

- Logged in as Admin, on the “Manage Users” tab
- Users are able to be created (e.g., user count isn’t maxed out)

### **Test Steps:**

1. Click the “Add User” button.
2. Verify the “Add User” dialog appears from the right side of the screen.
3. Enter valid values for: First Name, Last Name, Email.
4. Click the “Save” button.
5. Verify that the “Add User” drawer closes.
6. Confirm that a green pop-up appears with “User added successfully”.

### **Expected Results:**

- A new user appears at the top of the user list.
- Name and email reflect what was entered.
- Status is “Pending”.
- Other optional fields are blank.
- The total user count increases by one.

## **Test Case: Verify User List Loads Successfully**

Priority: P0

### **Preconditions:**

- Logged in as Admin
- At least one user exists in the system

### **Test Steps:**

1. Navigate to "Manage Users" tab.
2. Confirm the user list loads automatically.
3. Verify expected columns appear (Name, Email, etc).
4. Click a user's name to open the Modify User drawer.
5. Confirm data in drawer matches the row.
6. Scroll and confirm additional users load if present.

### **Expected Results:**

- Page loads with no errors.
- Accurate data is visible and complete.
- Drawer matches list data.
- User count is correct at the bottom.

## **Test Case: Update Existing User Information**

Priority: P0

### **Preconditions:**

- Logged in as Admin
- At least one user exists in the list

### **Test Steps:**

1. Click a user's name to open the Modify User drawer.
2. Change a value like First Name, Email, or Phone.
3. Click "Save".
4. Observe confirmation banner.

### **Expected Results:**

- Success message appears.
- Drawer stays open with updated info.
- List view reflects changes.

## **Test Case: Delete Existing User**

Priority: P0

### **Preconditions:**

- Logged in as Admin
- At least one user exists (not the logged-in account)

### **Test Steps:**

1. Open the Modify User drawer for another user.
2. Click "Delete".
3. Confirm modal appears with proper message.
4. Click "Confirm".

### **Expected Results:**

- Modal disappears and success message shows.
- User no longer appears in list.
- Row is cleanly removed.

## **Test Case: Suspend Existing User**

Priority: P1

### **Preconditions:**

- Logged in as Admin
- At least one user exists (not the logged-in account)

### **Test Steps:**

1. Open the Modify User drawer.
2. Click "Suspend".
3. Confirm the modal message.
4. Click "Confirm".

### **Expected Results:**

- Success banner appears.
- Status changes to Suspended in list.
- No visual or data errors.

## **Test Case: Edit User Note Field**

Priority: P2

### **Preconditions:**

- Logged in as Admin
- At least one user exists

### **Test Steps:**

1. Open Modify User drawer.
2. Add a note.
3. Click "Save".
4. Reopen the drawer.

### **Expected Results:**

- Note persists exactly as saved.
- Not visible in user list view.

## **Test Case: Change User Name and Verify List View Update**

Priority: P2

### **Preconditions:**

- Logged in as Admin
- At least one user exists

### **Test Steps:**

1. Open Modify User drawer.
2. Change the name.
3. Click "Save".
4. Observe the updated list view.

### **Expected Results:**

- New name appears in user list.
- No layout or rendering issues.
